【Chi Shih Building】

Construction on the Chi Shih Building began on April 11, 1988 at a cost of NT\$118,000,000. It has two basement floors in addition to nine floors above ground. Designed by C.C. Hsu & Associates Architects and Engineers Office and built by RUENTEX Construction CO., LTD. using long-span construction with post-tensioned, pre-stressed concrete beams, the Chih Shih Building was completed in May 1990. In October 2000, the Chi Shih Building underwent additional construction, with the expansion designed by C.C. Hsu & Associates Architects and Engineers Office and built by Lian An Construction CO., LTD. Today, it has a floor area of 19,922.05 square meters, standing 41.4 meters tall, and has two passenger and one freight elevators. The two basement floors contain student club offices, the first floor contains the Office of Student Affairs, Student Association Office, and Physical Education Center, the second to fourth floors contain classrooms, and the fifth to ninth floors contain laboratories.
